Phone : +91 - 9665945865

Objective :

I am looking forward to work in an organization which provides the environment for growth with competent and strong leaders in cloud and Devops technologies . I Am Professional having **3+ year** of **IT experience** in **Devops & AWS Cloud Services** using various tools such as **GIT , JENKINS , ANSIBLE , DOCKER , MAVEN & AWS Cloud Services** . I have an excited to learning a new technology & strong work ethic combined with a commitment to excellence in all project undertaken.

Employment History :

Currently working at **Ordinet Solutions Company** as a **Devops Engineer** from april 2019 to till date .

Total experience : 3 Year 5 month

Designation : Devops Engineer

Educational Qualification :

- **Bachelor Of Engineering(2018) From Amravati University .**
-

Professional Synopsis :

- Having good knowledge of **Software Development Life Cycle (SDLC)** .
- Worked on **Agile Methodology** process in the project .
- Frequently used of shell scripting language .
- Linux support , includes the provisioning and maintenance of Linux for development environments .
- Hands on experience on AWS services like **EC2 , AMI , Auto Scaling , VPC , EFS , Cloud Watch , ELB , EBS , SNS , IAM , Cloud Front , Cloud Trail , S3** .
- Worked on **Jenkins** pipeline and freestyle jobs .
- Also implemented a **multi-branch Jenkins pipeline** .
- Worked on SCM with the help of **GIT** and **GIT HUB** , create branches , access management .
- Worked on management of multiple project repositories , branches , tags etc .
- Creating **SNS** topic , creating subscribers and adding subscription .
- Setting up **SNS** topics for Emails .
- Having strong knowledge about **Windows** .
- Good experience in **Telecom** Domain and **Investment Banking** Domain .
- Good understanding of Build Automation Tool i.e. **MAVEN** .
- Good communication , collaboration with proficiency at grasping new technical concepts quickly and utilize the same in a productive manner .

- **Self motivated , Active and Fast learner** of new concept and new technology .
- Supported multiple environment such as DEV , QA , UAT environment .
- Implemented **CI / CD** tools and processes to improve delivery for the customer .
- Maintain and perform Configuration Management Tool such as **Ansible** .
- Worked on application and network load balancer , create target group also configured targets .
- Created multiple launch configuration as per requirement .
- Worked on S3 bucket replication .
- Having strong knowledge about all this monitoring services **Cloud Watch , Cloud Front and VPC Flow Logs** .
- Worked on **VPC** peering .
- Cross zone **AMI** and **EBS** snapshot sharing .
- Worked on Docker containers , deployed application on Docker container with the help of Jenkins .
- Launch various types of instances , create security groups , create AMIs .
- Worked on deployment of WAR on Tomcat application server .
- Good knowledge about Linux operating system .
- Creating the users , create the environmental variable and configure the email via Jenkins .
- Merge the branches and resolve the merge conflict issue on immediately .

Technical Skills :

Operating System	Linux (RHEL 7) , Windows 10
Language	Shell Scripting , Jenkins Declarative Pipeline , YAML
Test Management Tool	JIRA, Teams
RDBMS	MYSQL (RDS)
Monitoring Tool	Cloud Watch , Cloud Trail & VPC Flow Logs
CI / CD Tools	Jenkins
Containerization Tool	Docker and Docker-Compose
Configuration Management Tool	Ansible
Source Code Management	GIT & GIT HUB
Build Tool	MAVEN
Server	Apache Tomcat & HTTPD Server

Project Profile 1 :

Project Name	IWM
Client	SIPCOT Chennai.
Domain	Industrial waste

Roles and Responsibilities :

- Infrastructure monitoring with the help of Cloud Watch and Cloud Watch Logs.
- Setting up SNS topics for Email.
- Setting up DNS for UAT Environment using R53.

- Copying Server Logs into S3 for backup, also maintaining S3 data lifecycle.
- Using Cloud Front for low latency URLs.
- Creating IAM groups, roles and policies.
- Creating Cloud Trail for monitoring user activity for compliance purpose.
- Creating MYSQL DB in RDS and also maintaining its backups and read replica.
- Creating VPC peering connection between QA and UAT networks for private subnets.
- Check the merge conflict and provide the resolution on urgently .
- Using R53 for DNS registration and management.
- Worked on daily builds and deployment on DEV , QA and UAT Environments.
- Making sure the Environment are up and running for testing purpose.
- Creating and maintaining AWS infrastructure.
- Creating Jenkins CI / CD Pipeline for all the branches.
- Source Code Management of both development team and also for QA framework in GIT.
- Providing access to users in Source Code Management.
- Creating and Maintaining EC2 Instance , Creating AMI , EBS Snapshots.
- Setting up application Load Balancer for QA Environment.
- Creating the users , create the environmental variable and configure the email via Jenkins .

Project Profile 2 :

Project Name	CRM and Billing
Domain	Telecom

Roles and Responsibilities :

- Setting up SNS topics for Email.
 - Setting up DNS for UAT Environments using R53.
 - Copying Server logs into S3 for backup, also maintaining S3 data life cycle.
 - Using Cloud Front for low latency URLs.
 - Creating IAM groups, roles and policies.
 - Creating Cloud Trail for monitoring user activity for compliance purpose.
 - Creating MYSQL DB in RDS and also maintaining its backup and read replica.
 - Created VPC peering connection between QA and UAT network for private subnets.
 - Worked on daily builds and deployment on DEV, QA and UAT Environments.
 - Making sure the Environments are up and running for testing purpose.
 - Creating and maintaining AWS infrastructure.
 - Creating Jenkins CI / CD Pipeline for all the branches.
 - Source Code Management of both development team and also for QA framework in GIT.
 - Providing access to users in Source Code Management.
 - Creating and Maintaining EC2 Instances, Creating AMI, EBS snapshots.
 - Creating the users , create the environmental variable and configure the email via Jenkins .
 - Setting up Application Load Balancer for QA Environment.
 - Infrastructure monitoring with the help of Cloud Watch and Cloud Watch Logs.
 - Check the merge conflict and provide the resolution on urgently .
